

# PROLINE PAGEBUILDER FOR MAGENTO2

Create engaging and responsive content without HTML knowledge.  
You can simply drag'n drop the content and fill the available widgets with text and images. available widgets with text and images.

# ALL FEATURES AT A GLANCE

Our Magento2 extension extends the functionality of Ecoplan's ProLine B2B store solution with an integrated page builder for responsive content areas. The mobile first approach of the pagebuilder allows you to achieve the best possible results for mobile devices and desktop.

- Place slider with content at any position
- Slider carousel or single images
- Add and link buttons
- Output category links
- Product grid with image teaser
- Image Teaser with Text Element
- Image Teaser Asymetric (Mosaic)
- Create H1/H2 Headline and Sub-Headline
- Product carousel from category or single SKU's
- CMS Teaser with image and text
- Text block in CMS or category page

- Static block in CMS or category page
- Horizontale Linie
- Detailed product information with category teaser
- Building campaign and action pages with CTA
- FAQ page with Accordion
- Integration on CMS pages
- Integration on category pages
- Integration on product detail pages

All page builder elements are multi-placeable per page. All page builder elements can be made explicitly visible for mobile and/or desktop.
